PROFESSIONAL SUMMARY

Mechanical Engineering candidate at the University of Central Florida with a foundation in thermodynamics, dynamics, and materials science, complemented by a completed A.A. in Computer Science. Brings hands-on experience applying Python-based automation and data analysis in a professional setting, with demonstrated ability to build scalable technical tools. Multilingual and U.S. citizen, open to relocation.

EDUCATION

University of Central Florida

Candidate for Bachelor of Engineering in Mechanical Engineering. Minor: Mathematics.

Orlando, FL

May 2028

Relevant Coursework: Thermodynamics, Dynamics, Properties and Structures of Materials, Differential Equations

Santa Fe College

Associate of Arts in Computer Science.

Gainesville, FL

Aug 2025

EXPERIENCE

Business Development Intern

Dec 2025 – Present

Athena Real Estate

Orlando, FL

- Performed comprehensive deal analysis and property underwriting by evaluating financial statements, stress-testing key assumptions, and assisting in determining acquisition viability based on risk-adjusted performance metrics, using Python, Excel, and C.
- Automated data collection and cleaning using Python and GitHub workflows, reducing manual research time by 90% and improving data accuracy by 30% across property evaluations.

PROJECTS

Automated Treasury and Economic Market Monitor

March 2026

Python

- Built a Python-based automated reporting tool to monitor Treasury yields and 5 macroeconomic indicators, replacing manual market tracking with a scheduled email workflow.
- Consolidated 6 key rate and economic indicators into a centralized reporting pipeline for faster analysis.
- Developed automated charting for inflation history and trailing 12-month job growth, with monthly refresh logic based on newly released data.

RV Park Data Scraper and Property Database

March 2026

Python, Excel

- Built a Python web scraping and Excel automation tool to collect and structure RV park property data from online listing sources, replacing manual research with a scalable data pipeline.
- Expanded the firm's RV park database from 300 to 1,500 properties (5x growth), adding 1,200 new parks to support acquisition screening and comparative market analysis.
- Scaled data collection across 24 states and developed parsing, validation, and data-cleaning workflows to convert raw web data into consistent, analysis-ready records.

RV Park Automated Weekly News

March 2026

Python

- Built an automated system to aggregate RV and outdoor hospitality news from 3 sources and categorize content by topic.
- Generated executive-style summaries to support investment and acquisition decisions via scheduled weekly delivery.

ACTIVITIES & LEADERSHIP

Phi Theta Kappa

Aug 2024 - Present

Member

- Inducted for outstanding academic achievement; national honor society recognizing the top 10% of community college students.

SKILLS

Technical and Engineering Skills: SolidWorks, Fusion 360, Siemens NX, AutoCAD, CATIA, Financial Modeling, Investment Analysis, NOI and Cash Flow Analysis

Programming Languages and Technologies: Python (pandas, NumPy), C++, C, HTML, CSS, Java, GitHub, VS Code

Languages: Portuguese (native), Spanish (conversational), English (fluent)

Certifications: Harvard CS50: Introduction to Computer Science
